Example

Jill is married, works at a retail store, and earned \$37,000 in 2021. Jill's husband was unemployed in 2021 and didn't have any earnings.

Jill contributed \$1,000 to her IRA in 2021. After deducting her IRA contribution, the adjusted gross income shown on her joint return is \$36,000.

Jill may claim a 50% credit, \$500, for her \$1,000 IRA contribution.

Jill's Earnings	\$37,000
Jack's Earnings	\$0
IRA Contrib.	\$1,000
Adj. Gross Income	\$36,000
Saver's Credit = 50% of \$1,000 = \$500.
