---

## 2024 iOme Challenge Question

**The 118<sup>th</sup> Congress has appointed you as a member of the 2024 Independent Commission on Retirement Security. Commissioners have been given this charge:**

The retirement system needs to be re-evaluated and a comprehensive approach needs to be developed to modernize efforts in support of more efficient and effective programs that help Americans plan and save for a more secure retirement.

Your job as a Gen Z'er about to enter the workforce is to bring a new perspective to the Independent Commission on Retirement Security and to develop a comprehensive proposal to improve one or all of the three pillars of the nation's retirement system for all generations in order to improve their chances of living a financially secure retirement.

Your proposal should include specific policies that will target the needs and challenges of specific population segments you believe the commission should prioritize.
